Invest India is a not-for-profit joint venture between the Department for Promotion of Industries and Internal Trade (DPIIT), Ministry of Commerce & Industry, State Governments, and Industry associations. Operationalized in early 2010, Invest India has been set up as the dedicated Investment Promotion Agency (IPA) for attracting investments into the country in a structured, focused, and comprehensive manner. Invest India serves as the first point of reference for investors considering a location, industry, or partner in India.

Investment promotion and facilitation constitute our core mandate. Invest India is formed under Section 25 of the Companies Act 1956 for promotion of foreign investment with 49% equity of the then Department of Industrial Policy and Promotion, Ministry of Commerce and Industry and 51% shareholding by FICCI. The current shareholding pattern of Invest India is 51% of Industry Associations (i.e., 17% each of FICCI, CII & NASSCOM) and the remaining 49% of Central and 19 State Governments. By the virtue of its constitution, the position of the chairman of the Board of Directors of Invest India is reserved for the Secretary, DPIIT.

Invest India has developed blockchain-based startup certificate verification platform to manage and verify the Startup Recognition Certificates issued by Startup India.

ii. The platform can also be utilized by government departments, organizations, and other third parties to verify the details submitted by recognized startups for accessing incentives and support opportunities.

      b. Batch Publish: Allows manual selection of a series of data using unique identifier and then certificate for the series is published automatically through a single click.
      c. Automated Publish: End-to-End automated process which is running through a set of APIs which fetches data from the Startup India portal to the blockchain platform database and complete the process of certificate publishing at a pre-set clock time and validate those entries.

3. Allows to monitor and verify published certificate and its data including multiple search query functions.

4. The front-end verification page linked to Startup India portal allows users to access certificates along with the option to download on the submission multiple unique entries.

5. Each published certificate is empowered by a QR code which upon scanning redirects users to the verification page enabling a data match on the blockchain frontend interface.
